

Expand Your Hotel's Capabilities with Best-In-Class Integrations

With the SkyTouch /CONNECT API platform, integrations are now easier than ever. Hoteliers can future-proof their properties to easily keep up with the newest, cutting-edge and advanced technologies.

Central Reservation System (CRS)

Allow your hotel to automatically exchange availability, rates, restrictions and reservations between SkyTouch and your preferred CRS.

Customer Relationship Management (CRM)

Help your hotel drive business via customer relations and targeted marketing using innovative insights.

Mobile Check-in

Issue mobile keys to guests, allowing them to access their rooms from their smartphones.

Sales and Catering

Sales and Catering solution to assist your hotel in management of meetings and group business.

Back Office Accounting Export

Export financial data to a back office accounting program, including Quickbooks export.

Revenue Management

Coming Soon

Optimize yield / revenue by matching your hotel's room supply with demand to recommend the optimal price at which rooms should be sold.

Point of Sale (POS)

Automatically post food and beverage charges from your hotel's outlets to a guest's folio.
